

**TEGO® Foamex 831 – especially for food packaging:  
silicone- and mineral oil-free defoamer concentrate for  
waterborne printing inks**

March 30, 2011

TEGO® Foamex 831 is a high performance yet silicone- and mineral oil-free defoamer concentrate for waterborne printing inks. The active ingredients permit the formulation of printing inks for use on food packaging, particularly on absorbent substrates. TEGO® Foamex 831 conforms to foodstuff regulations such as XIV. BfR, 2002/72/EG, Annex. III, A-List of SR 817.023.21.

**Additives**

Additives from Evonik Industries play an important role in the development of high-quality coating systems. Depending on their type, additives can optimize the production process of the coating, adjust the application properties, or selectively influence the properties of the cured coating film. **The TEGO®** name stands for a wide range of additives for the most diverse liquid coating systems and printing inks.

**AEROSIL®** fumed silica allows selective adjustment of the flow behavior of paints and coatings. It also prevents sedimentation, or settling, of the pigments, fillers, and matting agents contained in coating systems.
